ej The TO(4) referred to on the SPAR was apparently inadvertently listed as a treatment process on the Part A application. The process referred to is simply a non-hazardous oil/water separator.

If you have any questions or problems with this submission, please call this office.

Sincerely,

Thomas J. Hanlon

T.S.D. Facility**

Dear Mr. Benvin,

Pending the acceptance of the closure plan sent to the D.E.R. on April 4, 1988, we are requesting the retraction of the above referenced Part B application.

Our attempts at solvent recovery and waste minimization have proven successful. Therefore, we are no longer in need of long term on-site storage of waste. It is our intention to close the facility as soon as possible.
